

INTELLIGENT TRANSPORTATION SYSTEM

Financial Project
Identification No.:
443768-1

S.R. 3 (Courtney Parkway) from Cone Road to S.R. 528

Brevard County

PROJECT DESCRIPTION

The Florida Department of Transportation (FDOT) is improving mobility on Courtney Parkway from Cone Road to State Road (S.R.) 528 in Merritt Island. The work includes the installation of an intelligent transportation system (ITS). ITS improves safety and traffic flow through the integration of communication technologies into the transportation system.

Crews will install an underground system of protective casing containing communication cables and wires that will run along Courtenay Parkway through the project limits. Traffic detection cameras and loops are being installed at the signalized intersections to collect current traffic data, enhancing traffic mobility by allowing for real time detection of timing and operational deficiencies.

WHAT TO EXPECT

During construction, motorists can expect single lane closures between 8 p.m. and 8 a.m. Electronic message boards and other signage will be used to inform drivers about closures.

Please note the construction schedule may change due to weather or other unexpected conditions.

For project information and current lane closures please contact Melanie Hand or visit the project website at www.CFLRoads.com

CONTRACTOR

Chinchor Electric, Inc.

PROJECT COST

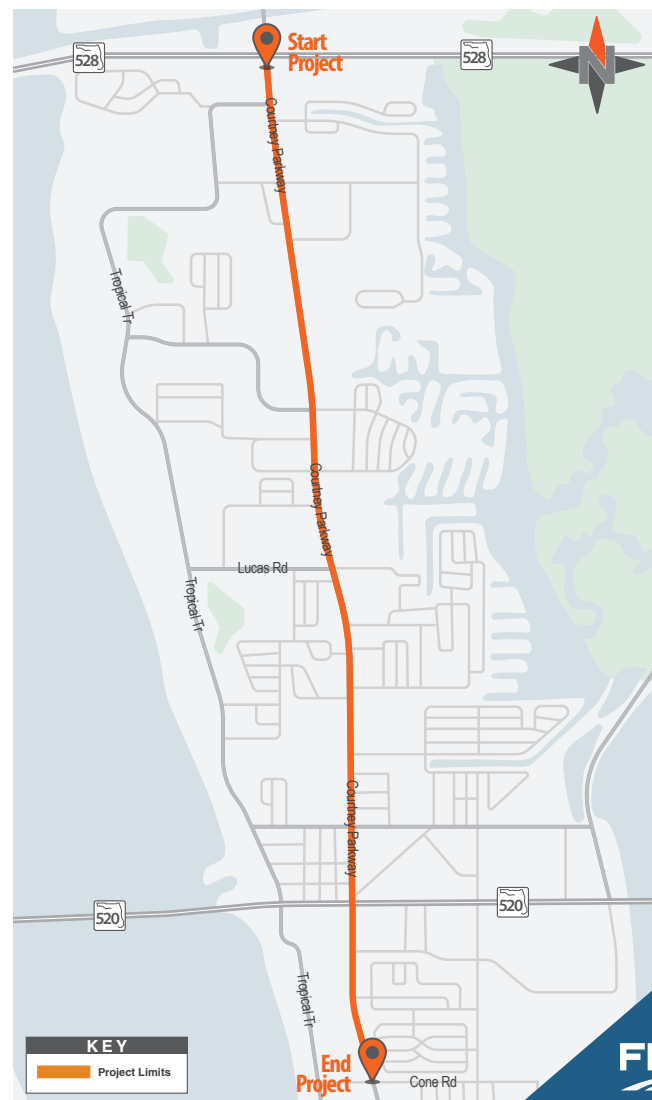

\$1.6 Million

PROJECT START

Summer 2020

ESTIMATED COMPLETION

Spring 2021
